1

Winter is in full swing, and near all the icy hills collects children with ice-boats, sledges and ... blades. "Letidor" figured out how to keep the child on such a dangerous ride.

All children love to play in the snow in the winter and ride a roller coaster. But at this very hill often parents begin to find out the relationship with each other:

- Your child is knocked down my daughter! How can you carry?
- Where are you looking at? It must be time to step aside! And anyway, why should your child paddle on the hill?

Sometimes it is the parents should control myself! But when it comes to the risk to children's health, Mom and Dad have to pull together and make the traditional winter entertainment as enjoyable and safe.

To do this, all useful to know how to behave in areas with large concentrations of children and adults, many of whom like to arrange a bunch of little, very real.

Secrets of behavior on the icy hill is divided actress and mother of three children Evgeny Kuzmin.

Evgeny Kuzmin, actress, mother of three children

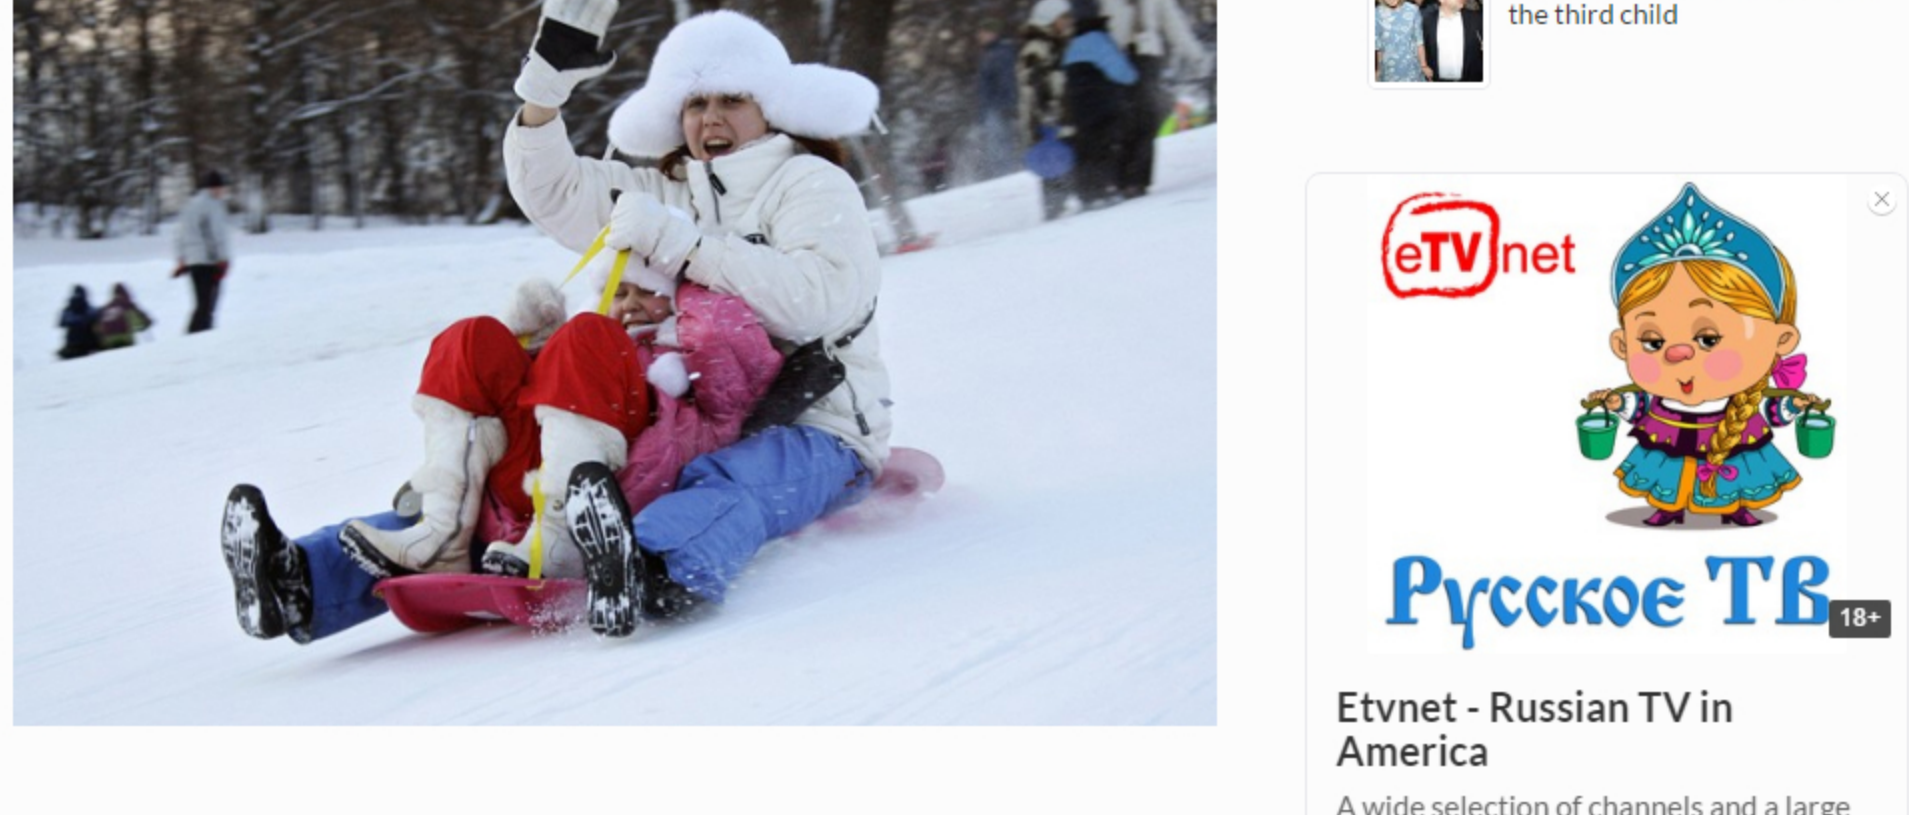

"Face Control" on the way down

If you walk on the hill with a small child 2-4 years, choose a safe descent, with no older children and students. Sparkle, agitated children can simply not see the baby, and completely without any intent to harm him: to push, touch, drop.

Rule free path

Do not let the baby to move down until the ice track will not be free. Speed on ice Congress nobody can predict, so if you do not want your child collided with someone, it is better to wait.

If the son or daughter is eager to quickly get off the roller coaster to hasten sluggish below, explain that it is better to do it with words, and not dangerous maneuvers.

Without traffic jams

Explain your child that linger at the bottom of the hill after the descent impossible. Every minute, slipping the other children who may accidentally bump into him.

Only the safety position

To avoid injury, do not allow your child to ride on his feet: he may lose his balance, banal slip and fall. On what injury can be obtained in the fall on the ice, and it is not necessary to tell.

Greeters are asked to leave

Climbing on the ice toward GATHERING FOR ledyankah and "cheesecakes" children, you should not! Even before you are going to let the baby slide show him where he needs to go up, so he kept his head and did not go its own way toward trouble.

With empty hands

Scoops, spatula, rake, cars and other favorite toy baby, with whom he came to the hill, it is better to leave aside. Remember that you - the parent, and the phrase "He does not agree to give me the sword. What can I do? "- This is not the parent's response.

In addition to these six important rules of conduct on an icy hill there are a few good tips that everyone should know mom and dad.

- First of all, going for a walk with your child and knowing that your vacation will be active, it is not necessary to wrap it too. The kid will be in constant motion, so it is enough thermal underwear, fleece jackets and a good suit that will not constrain the activity, thus it will not allow the snow to get to where it is not necessary. But the hat is best to wear closed so as not to muzzle. Such hats are often called "helmets". This is ideal for riding a roller coaster.
- Second, pay attention to the equipment: plastic ledyankah recognized as the most dangerous way to travel on the icy hill, and "cheesecake" is better suited for the ski slopes. As ice is preferred to ride a conventional Soviet sledding or snow-cats - they have better maneuverability and even falling from them impossible to get badly hurt.
- And thirdly, never for a moment did not leave child unattended while riding a roller coaster!
